

# Internet Security 2011

Maximum protection against all kinds of Internet threats

Panda Internet Security 2011 is a security suite that allows you to use the Internet for anything, like shopping and banking online, with total peace of mind and without any interruption. It protects you from viruses, hackers, online fraud, identity theft and all the other known and unknown threats.

Also, it keeps your inbox spam-free, and allows you to browse the web privately and securely with the entirely new Panda Safe Browser. With the Parental Control, your children can browse the Internet safely.

## More security, more protection

More protection: Collective Intelligence is an information network based on a user community where everyone contributes. Protect and detects in real time.

## More speed and more simplicity

More lightness on your PC: Besides being very easy to use, uses an Internet based system, the Collective Intelligence, which does not impact in your PC.

## More complete than ever

More than a simple Antivirus: Includes several new features and improvements to a complete peace of mind.

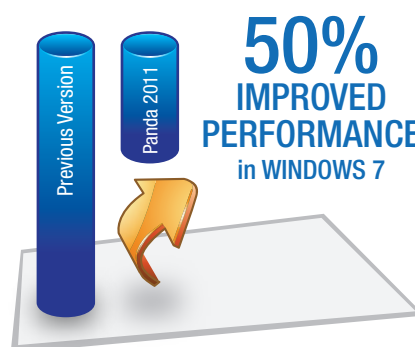

Antivirus  
Firewall & Identity Protect  
Anti-Spam & Parental Control  
**NEW!** Multimedia/Gaming Mode  
**NEW!** Home Network Manager  
**NEW!** Remote PC Access  
**PLUS!** Safe Browser (Sandboxing)

Unleash the power of cloud computing

A new threat is identified and in a matter of seconds all of Panda Security's customers worldwide are protected. No matter where it appears: across the ocean or in a city nearby.
